Impact Log

Actions Taken

You've completed the Educator Canvas but might have a few steps to do before you can start implementation. Example: You may need to actually gather user input, research a few apps, or read an article or two. Document any activities undergone to prep for your project. THEN, track your implementation steps and time taken to actually DO your project.
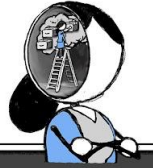

Planning & Prep

Dates/Hours

Implementation

Impact Log

Reflection

Now take time to reflect on your project: Did you accomplish your goal(s)? What was the impact?
What might you change if you did this project again? How might you share your work?
Reflect on the process: What worked, what didn't? What resources and actions were most helpful?
Where could you save some time in the future?

The Project

The Process
