Grade:

Scale:

- **Exceeding expectations** - student meets expectations and creates a histogram using the data.
- **Meeting expectations** - data display, median and mean are all accurate, wrote a sentence explaining which is the better measure of center with 1 reason, completed the framework and had comments from a peer.
- **Approaching expectations** - work is accurate, but does not include calculation or explanation of better measure of center, framework incomplete OR relied on help from a teacher to be accurate.
- **Not meeting expectations** - inaccurate data display, mean and/or median, no discussion of accuracy.
