

Name: _____

Math Self Reflection

Please answer the following questions. For questions that have written responses, use complete sentences and provide examples and/or explanations.

1. During the unit, I felt the following. Circle all that are true for you. It could be that you experienced this feeling often, or even just sometimes.

Challenged

Stuck

Ready for more

Confident

Proud of my work

Ready

Stretched

Hardworking

Unready

2. At the completion of the unit, I feel most confident about...

Representing situations
with diagrams

Representing situations
with equations

The Distributive
Property

Plotting inequalities on a
number line

Writing equivalent
expressions

The Commutative
Property

Solving Equations

Solving inequalities

Solving for variables
(solving for x !)

Matching equivalent
expressions with situations

Writing equivalent
expressions

Finding equivalent
expressions

3. At the completion of the unit, I feel least confident about...

Representing situations
with diagrams

Representing situations
with equations

The Distributive
Property

Plotting inequalities on a
number line

Writing equivalent
expressions

The Commutative
Property

Solving Equations

Solving inequalities

Solving for variables
(solving for x !)

Matching equivalent
expressions with situations

Writing equivalent
expressions

Finding equivalent
expressions

4. What did you notice about your student habits that helped you the most? Here, think about habits like getting your homework done at a designated time (and on time!), following along with corrections in class, communicating with your teacher, writing in your planner, and correction opportunities.

5. What did you notice about your math habits that helped you the most? Here, think about habits like taking your time with individual problems, showing your work, checking your calculations, applying the strategies we're learning in class, and going back over a problem once it's complete to check your thinking.

6. What are you most proud of in your work on this unit?

7. Take this home and have a conversation with a family member about a goal you might set for the next unit, and how will you help yourself to reach it? This intention could be around homework, class participation, IXL, writing in your planners, attending office hours, or something else. **Write about it and have your family member sign below.**

Mission accomplished! Thanks for doing some reflecting on math. It's helpful for both of us!
